## OZIRIS SOFTWARE APP FIRST RELEASE

---

Beston Global Food Company Limited ('BFC' or the 'Company') announces that the patent pending software OZIRIS First Release is now available for download from both Australian App Store and Google Play.

This Release will allow users to scan and view Product information and trace it back to its producers.

It runs in both English and Chinese languages.

The OZIRIS website is live at [www.oziris.com.au](http://www.oziris.com.au) where users can view and experience the technology, how it works, how to join and find our participating producers that have joined the platform prior to the launch.

Facebook, Instagram and Twitter ([ozirisfoodtrace](https://twitter.com/ozirisfoodtrace)) have all been linked to the website to provide interesting, exciting and fun feeds regarding food.

We are pleased to announce also, that we have a number of other non BFC producers that have joined the OZIRIS platform prelaunch. Their products will be available within the next few weeks.

This First release of the OZIRIS App does not allow the full capabilities of the track and trace technology. But it allows consumers to understand how the technology works and identify the identity of the products and their producers.

Subsequent OZIRIS releases over the next few weeks and months will sequentially enable the additional capabilities and will provide products end to end Track, Trace, Mobile Purchase and Counterfeit detection.
